Subject: RE: Teedon Pit Extension

Hi Brian,

Attached are three comments posted to the Teedon Pit Extension proposal notice (ERO#013-4911). Two of these comments were posted to the initial proposal notice on the new ER registry after the April 24, 2019 registry transition date and were not sent to you previously. These two comments are similar in nature to some other comments received during the notice period for ER#013-4911 from March 20 – May 6, 2019 on the old registry (sent to Jessica Ferri on May 29, 2019) in that they identify concerns for groundwater and are advocating for further studies before a decision is made on the application. Only one comment in the attached was posted to the update notice regarding the name change. The comment does not identify a specific reason for the concern with the aggregate application or the proposed name change.

Our office has reviewed the Notification and Consultation report for the Name Change proposal for the Teedon Pit application and we have no comments or concerns.

We will prepare a letter withdrawing our ministry's objection to the Teedon Pit Extension application.

Regards,

Kim Benner
